Advertising Prudence

—

No business prospers when public interest in it is wanting

No one trade is ever good when there isn't much trading in similar lines

All know that many customers are essential to one's business; one wouldn't sell to one customer only, if intending to stay in business

The simplest form of prudence is to create advertising influence through the use of the better advertising mediums

One of the very best mediums is the CITY DIRECTORY

It is consulted by the buying and trading public All the Time

The Sign Over Your Door

is a good thing, isn't it? You would not think of doing business without it.

But it is only seen by those who pass your way. If you could put a sign where EVERYONE would see it, would it interest you?

The City Directory

is where people look when they want to do business. You should make it easy for them to find you, by putting such information as a buyer wants, in the Directory, properly indexed, under all HEADINGS where he might look for you.

To be properly registered costs less than to be left out.

VOL. V.

COMPILED AND PUBLISHED BY

Henderson Directories Limited

279 Garry Street, Winnipeg, Manitoba

Entered according to Act of Parliament of Canada, in the year One Thousand Nine Hundred and Twelve, by Henderson Directories Limited, in the Office of the Minister of Agriculture.

Preface

The fifth annual edition of the Saskatoon City Directory is herewith presented with the assurance that it is as thoroughly up-to-date as time and a systematized method can make it.

The City Directory is of great importance to the community for it clearly portrays the city, its people and institutions, growth and progress as no other work can. Every resident is interested and represented in it, and it is a matter of vital importance that they be correctly entered in the record. It furnishes exact data for the city's measure of prosperity, which is unerringly shown by the great increase in population, businesses and professions as indicated in the pages of this book.

The work of enumerating, tabulating, checking and compiling the data herein contained has all been done by a trained and competent force.

This volume contains a very much greater amount of information than any of its predecessors altho' in size it is very little larger. This is accomplished by condensing the type and lengthening the pages. It was necessary to do so, otherwise the book would become too bulky and unwieldy. In no other essential has a change been made.

Special attention is directed to the Miscellaneous Section, complete with figures and statistics concerning the growth, development and industrial activities of the community.

The publishers wish to thank the business fraternity for their liberal support of the advertising pages and the public generally for their courtesy and interest in supplying the information which made the work possible.

City of Saskatoon

Geographical Location

To locate the City of Saskatoon (incorporated 29th May, 1906) it is merely necessary to place the finger on the centre of any reliable map of Western Canada. It will then be seen that Saskatoon is not only in the centre of the West, but also in the very middle of the Province of Saskatchewan; and, at the same time, right in the heart of the Great Hard Wheat Belt. In other words, Saskatoon is, in a very real sense, The Centre of Centres.

Wholesale Distributing Territory

Another feature commercially enhancing the City's unique geographical location is that she is far distant from any other large point.

The distributing territory solely controlled by Saskatoon wholesalers extends to upwards of 46,000 square miles even now embracing over 200 thriving points on operating lines. The total railway mileage undisputably controlled by Saskatoon wholesalers on the three great trunk lines and branches thereof totals 1686, or just 263 miles more than the distance from Winnipeg to Montreal per C.P.R., which is 1,423 miles. It is all a matter of geographical isolation and distributing freight rates; and any of the railways will confirm the foregoing.

Naturally, the possession of an area so vast, fertile and well settled involves an enormous business. Consequently, it is not surprising that Saskatoon is to-day doing the second largest wholesale distributing business in the Prairie Provinces, being exceeded by Winnipeg alone.

Railway Facilities

The strategic location of the City has not been overlooked by the three great railway companies, which have, for some years past, made it the centre of exceedingly remarkable railway construction. The Canadian Pacific, Canadian Northern and Grand Trunk Pacific are all in evidence. Each company has its own steel and concrete bridge spanning the big South Saskatchewan which flows through the heart of Saskatoon, and, it might be mentioned here that three of these bridges were building at the self-same time, a fact indicating the sudden and extraordinary character of the City's development. Altogether, there are four bridges over the river at Saskatoon, while a fifth is now on the tapis.

Mail Service

Ten different operating railway outlets radiate from Saskatoon. Over these, thirty passenger trains daily arrive and depart at her three railway stations, while twenty-two mails are each day received and distributed at her post office.

Growth

In the accepted sense, Saskatoon has no past: There are lads and lasses at school to-day who saw and lived through the beginning of things, and can therefore tell of all there is to tell. Within seven years, from a slender sprinkling of shacks with their 113 dwellers, has sprung the solid City of Saskatoon with its thriving, prosperous population now conservatively estimated at about 25,000 and increasing daily with almost incredible rapidity.

Crop-sureness of Territory

Apart entirely from a singularly favorable geographical location, other recommendations equally important are playing their part in the above remarkable progress. One of such is the fertility of the vast territory tributary to Saskatoon and its enviable record for crop-sureness now so conclusively demonstrated. The soil is neither too heavy nor too light but just right. It comes into heart very early in Spring and retains its warmth late into the Fall. The latter fact is a particularly important consideration from an agricultural standpoint.

Natural Beauties

Another most potent factor is that Saskatoon's exquisite natural beauty is proverbial throughout the West. Its appeal to the stranger is instant, irresistable,—and all the more charming, because so unexpected. Perhaps, the main secret of this charm is the presence of the magnificient South Saskatchewan River that wends its way between beautifully wooded banks, right through the City's heart, not merely providing unending delight for the eye, but also affording an inexhaustible supply of pure water.

Educational

With her central location, exceptional railway facilities, land fertility and exquisite natural charm, it is scarcely to be wondered that Saskatoon was selected as the seat of the University of Saskatchewan with its agricultural College and College Farm, which institutions absorb an area of one thousand, three hundred and thirty-three acres, and are planned for the ultimate accomodation of about five thousand students. During 1911, over $1,000,000, were expended upon buildings, while this year further heavy expenditures have been made.

In addition to the University and Agricultural College, Saskatoon possesses five splendid modern schools and a collegiate institute which cost over $125,000 In May 1912, there were 2120 scholars in attendance while in the same month of the year 1906, the total enrollment was 296.

Saskatoon is also the location of the only Anglican Theological College in Saskatchewan. About 100 students are now in attendance. Over $100,000 has been expended on buildings within the past two years.

Industries and Power

The industrial life of the city is already well awakened and developing most encouragingly. Quite a number of important concerns are already established. However, with a view to still further stimulating industrial development, the citizens of Saskatoon, this Spring, within four and one-half days, subscribed ONE MILLION DOLLARS ($1,000,000), toward their Industrial League, organized to encourage the location of suitable manufacturing concerns, to which end the City is also prepared to grant generous concessions.

Saskatoon's New Power House constitutes the very last word in electrical development. Its plant is the very latest known to science. Consequently, the City is in an unusually favorable position to supply power at surprisingly attractive rates.

Public Spirit

Since the first, the policy of the City Fathers has been essentially progressive. They have been impelled in all their efforts by that dominant sense of good citizenship which precludes the very faintest shadow of anything resembling graft.

Municipal Ownership

The City owns and operates its light and power plants and also its street car system, the initial thirteen miles of which will be ready for service toward the end of the present year. It is also interesting to mention that Saskatoon City Hospital was the first municipally owned and controlled institution of its kind in the West, and the second in the Dominion. Its success has been remarkable and its establishment a godsend to the entire district. Arrangements have now been made for the erection of a new $300,000 building.

Water, Sewers, Sidewalks, Etc.

Saskatoon enjoys an unlimited supply of pure water for all purposes. 24.30 miles of water mains are already laid and 22.65 miles of sewers. A further thirteen miles will be added to both ere this season ends. Upwards of 50 miles cement sidewalk is already laid, also three and-a-half miles of street paving.

Comparative Building Statistics

Probably, the building statistics constitutes the best ana most definite indication of Saskatoon's phenomenal growth:—

Building Statistics for 1908	$ 115,623
Building Statistics for 1909	1,002,905
Building Statistics for 1910	2,817,771
Building Statistics for 1911	5,028,366
Building Statistics to 22nd July 1912	5,413,315
Estimated Building Statistics for 1912	7,000,000

CITY WATER WORKS AND ELECTRICAL DEPARTMENT

The plant consists of: Three engines and generators, viz.:—

350 H.P.	225 K.W.
180 H.P.	125 K.W.
750 H.P.	500 K.W.

2,200 volts A.C. direct connected two phase generators, 2 Condensers and air pumps, 1 Tandem compound 850 gallons duplex press pumps, 1 high duty pump 850 gallons, 2,850 gallon deep well pumps, which pump through the condensers and into a 30x12x12 ft. tank, thereby supplying the city and condensing the water for the entire plant. Three 125 H.P. boilers and three 250 H.P. boilers with the necessary feed pumps. Hopps heater, injectors, etc.

The reservoir on Nutana Hill has a capacity of 180,000 gallons. A domestic pressure is maintained at 80lbs. while for fire purposes the pressure is raised to 125lbs. per square inch. There are 200 fire hydrants throughout the city.

There are 40 miles of lines of electric wires, 55 series A.B. and Westinghouse arc lamps. About 2,500 residences, offices and other buildings are connected and about 4,000 incadescent lamps installed.

City Pumping Station and Power House are on west side of the river at the south extremity of Avenue H.

The standing pressure is derived from standpipe located corner 11th Street and Broadway, and the registered average is from 60 to 65 lbs., which is ample for domestic purposes and small conflagrations. In case of a large fire the Fire Chief upon his arrival immediately telephones the Pumping Station for increased pressures. The warning is then given to the man in charge of the standpipe by the blowing of a large whistle, and the response is made by turning the key and thereby stopping flow of water going into the standpipe, which causes the pressure to come direct from the pumps.

Assessment

Another sound criterion of the development of any city is the growth of its assessment. In this line, Saskatoon's figures will be found interesting:—

Assessment	1906	$ 2,517,145
"	1907	6,621,327
"	1908	7,450,135
"	1909	8,156,357
"	1910	10,748,639
"	1911	22,274,273
"	1912	36,733,505

Banks

The number of banks located at any point may be taken as a fair gauge of the commercial importance of such point: Saskatoon has fifteen chartered banks and three trust companies doing a banking business. In addition, all the leading trust, loan and insurance companies are duly in evidence.

Newspapers

Another convincing indication of general up-to-dateness is the number and quality of Saskatoon's newspapers, viz.:—

The Daily Phœnix — The Saskatoon Daily Star
The Weekly Phœnix — The Saskatoon Weekly Star
The Saturday Press

SYSTEM OF STREET NAMES AND NUMBERING

Streets run east and west

Avenues run north and south

The townsite has been laid out allowing 18 streets in Nutana, south of the Saskatchewan River. Eighth to Eighteenth Streets being wihin the Corporation limits; while First Street to Seventh Street lies south of the southern city limits. First Street to Eighteenth Street are in Nutana; Nineteenth Street being first street on the west side of the River East of th C. N. R. tracks and west of the River streets are numbered from Nineteenth to Twenty-sixth, West of the C. N. R. tracks in Riversadale streets number north from Eleventh to Thirty-third, the northern city limits.

With the Avenues the C. N. R. tracks are the dividing line. Avenues First, Second, Third, Fourth and Fifth running north and south and paralleling the C. N. R. tracks to the east are arranged numerically from the C. N. R. to the Saskatchewan River. West of the C. N. R. avenues are arranged alphabetically from Avenue A to Avenue P, the western city limits.

In Nutana the street information is taken east from the Saskatchewan River to eastern city limits. On the Avenues north from 8th Street the southern city limits. The system of house numbering adopted by various cities throughout the continent known as the Decimal or Philadelphia system, viz., an even hundred numbers are allotted to each block, the principal advantage of the system is that the number indicates how many blocks distant it is from any given point on a street or avenue.

On the Avenues, which run north and south, a number is allotted for every 12 feet and on streets running east and west, a number is allotted for every 15 feet.

Odd numbers on the east and north sides. Even numbers on the west and south sides.
